

FY 2023 Market Highlights

Summary

In 2023, against the backdrop of the Israel-Gaza war, the continuation of the war in Ukraine and increased political tensions, the domestic market capitalisation went up considerably (13.6%) year on year, while the value traded, number of new listings and investment flows went down. Meanwhile the volumes of derivatives continued to rise significantly (especially options volumes), which suggests an increased need to hedge against market uncertainty.

Key points

Cash equity

- **Global equity market capitalisation** increased 13.6% in 2023 compared to the end of 2022, with all regions going up. Over 13 trillion US dollars were added to stock markets worldwide.
- **Trading value** and **volumes** declined 10.6% and 3.4%, respectively, in 2023. All regions recorded their lowest annual trading value in the last three years.
- The **average trade size** was at its lowest level in the last three years (at USD 2,776.45 /trade).
- The **non-IPO listings** in the Americas and EMEA region were at their minimum level in the last three years, while APAC region recorded its maximum. The **capital raised through already listed companies** registered its minimum level in each region.
- The **number of IPOs** in every region was at its lowest in the last three years, markets welcoming only 1,217 IPOs in 2023.
- The **capital raised through IPOs** fell sharply compared to 2022 (-59.3%). While APAC and EMEA regions declined -43.3% and -86.1%, respectively, the Americas experienced a significant increase (71.3%).
- The **average size of an IPO** followed the same trend. While in the APAC and EMEA regions, it recorded its lowest level in the last three years, amounting to USD 86.11 million/IPO and USD 88.11 million/IPO, respectively, in the Americas it almost doubled, reaching USD 126.41 million/IPO. Despite this decline, global markets hosted five unicorns in the second half of the year (in addition to the three unicorns listed in the first half of the year).
 - **American markets** welcomed to 139 IPOs in 2023 generating USD 17.57 billion, result made possible thanks to some noteworthy IPOs: in September **Nasdaq** hosted *ARM Holding Plc*, the largest IPO of the year, an IT company, generating USD 4.87 billion; in the same month, it welcomed *Maplebear Inc* (a consumer staples company) and *RayzeBio Inc* (a healthcare company), generating USD 660 million and USD 311 million, respectively; **Nasdaq** was also the venue of choice for *Oddity Tech Ltd* (a consumer discretionary company) and *Apogee Therapeutics Inc* (a healthcare company) to go public in July, generating USD 423.68 million and USD 300.05 million, respectively.
 - **APAC markets** opened their doors to 875 IPOs in 2023 generating USD 75.35 billion. The largest IPO of the region, *Hua Hong Semiconductor Ltd*, went public on **Shanghai Stock Exchange** in August, generating USD 3.14 billion. In the same month, **Shanghai Stock Exchange** welcomed also *Huaqin Technology Company* (which designs and sells smartphones, tablets, notebooks and other products), generating USD 866.44 million, after in July having hosted *Baimtec Material Co* (which manufactures and distributes aviation and aerospace parts and materials), generating USD 1.05 billion. In the same month **Indonesia Stock Exchange** opened its doors to *Amman Mineral International* (a basic materials company), generating USD 696.74 million. **Japan Exchange Group** hosted in October *Kokusai Electric Corp* (an electric appliances company), generating USD 821 million.

- **EMEA markets** hosted 203 IPOs in 2023, raising USD 18.03 billion. The largest EMEA region IPO in 2023, *Hidroelectrica SA*, an electricity producer, chose **Bucharest Stock Exchange** to list its shares in July, generating USD 2.06 billion. In the same month, **Deutsche Boerse AG** hosted *Thyssenkrup Nucera AG*, a renewable energies company, generating USD 665.84 million, while in September the same venue listed *Schott Pharma AG*, generating USD 859.75 million. In October, **Saudi Exchange (Tadawul)** welcomed *Ades Holding Co*, an oil and gas driller, generating USD 1.22 billion, while in November it hosted *SAL Saudi Logistics Services Co*, which generated USD 678.04 million.

Exchange-traded derivatives

- The **number of exchange-traded derivatives contracts**, including both options and futures, reached their highest level in the last three years, amounting to 104.06 billion for options and 30.33 billion for futures (134.40 billion derivatives contracts traded). This represents a 58.9% increase compared to 2022.
 - This increase was driven mostly by options, which rose 89.4% (and account for 77% of all derivatives contracts traded), while futures increased 2.4%. Such an increase in option trading volume could be due to the increasing need to hedge against market uncertainty.
 - Volumes across all underlying asset classes increased, except for single stock futures, stock index futures, currency futures and ETF futures, where volumes fell year-on-year. Notably, stock index options and commodity options recorded three digit increases of 130.6% and 135.8%, respectively. Exchanges with an excellent performance were **National Stock Exchange of India** (142% year-on-year increase in stock index options) and for commodity options: **Zhengzhou Commodity Exchange** (+204.8%), **Dalian Commodity Exchange** (+112.7%) and **Multi Commodity Exchange of India** (+249.2%).
 - All three regions recorded their peak over the last three years: the Americas region 27.83 billion, APAC region 98.78 billion, and EMEA region 7.79 billion contracts traded. However, the growth varied significantly between regions. While APAC grew 96.2%, EMEA recorded a 2.5% increase and the Americas region rose 4.6%.
- While **equity, commodity, interest rate and ETF derivatives** volumes witnessed double digit increases (78.1%, 27%, 19.4% and 12.4% respectively), **currency derivatives** were the only product line whose overall volumes (that is, considering both futures and options) increased only 7.6% in 2023.
- While **equity derivatives** increased their share in volumes traded, **currency, commodity and interest rate and ETF derivatives** decreased their share, but each product line reached its maximum volume in the last three years.
- **Stock index options, currency options, commodity options, interest rate options, interest rate futures and ETF options** reached their peak in volumes in the last three years, while **ETF futures** recorded its lowest level during the same period.
- **Stock index options** are by far the most traded (60.8% share) of derivatives contracts with 96.4% of them being traded on **National Stock Exchange of India**. The same exchange accounts for 98% of the **currency options** market.
- **Interest rate options** performance is mostly due to the **CME Group**, which accounts for 64% share of global volumes and increased 26.8% year on year. The same exchange accounts for 50% share of global volumes of interest rate futures.
- **Interest rate derivatives:** Year-on-year, short-term (STIR) derivatives and long-term (LTIR) derivatives volumes increased 16.9% and 11.7%, respectively, with all product lines going up: STIR options (38.2%), STIR futures (9.8%), LTIR options (5.8%), LTIR futures (12.6%).
- **Commodity derivatives:** Most commodity derivatives rose year-on-year: agriculture (30.4%), energy (32.3%), precious metals (8.5%), non-precious metals (13.4%) and other commodity derivatives (29.8%). Only index commodity derivatives declined 68.7%.

Other products

- While the **number of listed exchange-traded funds (ETFs)** increased (+6.4%) when compared to 2022, the **ETF value traded** declined (-14.4%). The EMEA region registered declines in both number of listings and value traded, while in APAC region both changes were positive.
- The same trend was noticed in the **number of listed securitised derivatives (SD)** which increased (+12.7%) year-on-year, but the **value traded** fell (-22.5%).
- The **number of listed investment funds (IF)** went down year-on-year (-4.4%) while the value traded rose (+7.4%). EMEA region recorded declines in both number of listed investment funds and value traded.

Summary of the methodologies adopted for this report

All data contained in the following equity market tables include the Main/Official market and the Alternative/SME markets supervised and regulated by the Exchange.

Domestic Market Capitalisation

The market capitalisation figures include:

- shares of listed domestic companies;
- shares of foreign companies which are exclusively listed on an exchange, i.e. the foreign company is not listed on any other exchange;
- common and preferred shares of domestic companies;
- shares without voting rights.

The market capitalisation figures exclude:

- collective investment funds;
- rights, warrants, ETFs, convertible instruments;
- options, futures;
- foreign listed shares other than exclusively listed ones;
- companies whose only business goal is to hold shares of other listed companies, such as holding companies and investment companies, and regardless of their legal status;
- companies admitted to trading (companies admitted to trading are companies whose shares are traded at the exchange but not listed at the exchange).

- **Australian Securities Exchange:** including investment funds.
- **BME Spanish Exchanges:** including investment companies listed (open-end investment companies) that differ from investment funds included in Table 1.3 because of their legal status and that cannot be distinguished from other listed companies.
- **Bolsa de Valores de Lima:** Includes 26 foreign companies with shares negotiated under a special modality.
- **Borsa Istanbul** market capitalisation/listed companies figures include investment companies and holdings.
- **Deutsche Börse:** excluding the market segment "Freiverkehr" (unofficial regulated market).
- **Euronext:** includes Belgium, Ireland, France, Italy, the Netherlands, Norway and Portugal.
- **Johannesburg Stock Exchange:** figures include the market capitalisation of all listed companies, but exclude listed warrants, convertibles and investment funds.
- **Korea Exchange:** including Kosdaq market data.
- **Nasdaq Nordic Exchanges:** includes Copenhagen, Helsinki, Iceland, Stockholm, Tallinn, Riga and Vilnius Stock Exchanges.
- **NSE India:** including market data from NSE's SME platform "EMERGE"

- **Singapore Exchange:** market capitalisation includes domestic listings and a substantial number of foreign listings, defined as companies whose principal place of business is outside Singapore. Inactive secondary foreign listings are excluded.
- **TMX Group:** includes companies listed on TSX Venture.
