

The
Financial
Markets
Specialist

Chella Software is a global provider of products and bespoke solutions to financial markets. We specialize in high volume low-latency solutions for post-trade systems including Risk Management, Clearing and Settlement, Collateral Management and Compliance.

Our Solutions have helped our clients offer traded and OTC products including derivatives, comply with QCCP and PFMI requirements, promote financial inclusions and restore investor confidence in markets, through superior risk management and compliance. Our post-trade solutions process a significant volume of the world's derivative trades.

We have also successfully re-engineered legacy mission critical applications for very large Market Infrastructure Institutions. This has involved massively scaling up performance, introducing new features and functionalities, while migrating these applications to the latest technologies.

We have an unblemished track record of delivering extremely reliable solutions, on-time to our clients. We are valued for our deep domain expertise, agility and ease of doing business. Our list of highly satisfied clients includes leading Central Banks, Stock Exchanges, CPPs and Brokerages in Asia, Middle East and Africa.
