

**NEW** Revenue Opportunity

# Enabling your Exchange to become the **cloud**

Trusted by the World's Leading Exchanges

**Lowering the barriers of entry and ensuring a level playing field is key for Exchanges looking to create a more dynamic, liquid, and competitive marketplace.**

With **Beeks Exchange Cloud**®, Exchanges gain scalable, secure, and cost-efficient infrastructure-as-a-service. This allows your Exchange to offer both new and existing members highly scalable and secure services within your colocation facility or data centre.

Similar to cloud service subscriptions, Exchange Members can access the Market and Data Services on demand, as well as analytics and scalable compute, safe in the knowledge that all transactions and messages are securely and fairly transmitted within the Exchange's own environment.

#### **New**

#### **Revenue Stream**

Generate recurring income by offering cloud-like services on demand

#### **Faster Market Entry**

Reduce time-to-market for new and existing participants

#### **Instant Data Access**

New firms can quickly access historical data and back-test models

#### **Sustainable Growth**

Firms can scale operations flexibly as they grow.

#### **Optimise & Enhance Existing Colocation**

Maximise potential with cloud-based, scalable services.

#### **Boosted Liquidity**

Proven to increase your current colocation revenue stream
